Module 3.2.P Drug Product: Corvala (setrapine) 10 mg tablets

Applicant: Halden Therapeutics, Inc. Product code: HT-204

This section is provided in accordance with the Common Technical Document format. Information herein is confidential and proprietary to Halden Therapeutics, Inc.. Batch records referenced in this section are available for inspection at the manufacturing site.

3.2.P.1 Description and Composition of the Drug Product

Corvala (setrapine) 10 mg tablets are manufactured using the excipients listed below. All excipients comply with the referenced compendial monographs.

Excipient	Grade	Function
Microcrystalline cellulose	Avicel PH-101, NF	Filler
Lactose monohydrate	Fast-Flo 316, NF	Filler
Magnesium stearate	NF, vegetable source	Lubricant

3.2.P.2 Pharmaceutical Development

3.2.P.2.1.2 Excipients

Avicel PH-101 was chosen for its finer particle size, which improves content uniformity of the low-dose active in the wet granulation process. Blend uniformity across development batches met the acceptance criterion of 90.0-110.0%.

The selection of all excipients and their grades followed a science- and risk-based approach. The following guidance was considered: ICH Q8(R2) Pharmaceutical Development; ICH Q6A Specifications; FDA Guidance for Industry: Nonclinical Studies for the Safety Evaluation of Pharmaceutical Excipients.

3.2.P.4 Control of Excipients

Excipients are tested on receipt against the current compendial monograph and the applicant's internal excipient specification. Certificates of analysis from qualified suppliers are reviewed by Quality Assurance prior to release.

3.2.P.5 Control of Drug Product

Release testing includes appearance, identification by HPLC, assay (95.0-105.0%), related substances, dissolution and uniformity of dosage units.
