Module 3.2.P Drug Product: Zentaro (fimolast) 5 mg orally disintegrating tablets

Applicant: Halden Therapeutics, Inc. Product code: HT-611

This section is provided in accordance with the Common Technical Document format. Information herein is confidential and proprietary to Halden Therapeutics, Inc.. Batch records referenced in this section are available for inspection at the manufacturing site.

3.2.P.1 Description and Composition of the Drug Product

Zentaro (fimolast) 5 mg orally disintegrating tablets are manufactured using the excipients listed below. All excipients comply with the referenced compendial monographs.

Excipient	Grade	Function
Mannitol	Pearlitol 200 SD, USP	Filler
Crospovidone	Polyplasdone XL-10, NF	Superdisintegrant
Magnesium stearate	NF, vegetable source	Lubricant

3.2.P.2 Pharmaceutical Development

3.2.P.2.1.2 Excipients

Spray-dried mannitol (Pearlitol 200 SD) was selected for its pleasant mouthfeel and compressibility, enabling disintegration in under 30 seconds per USP <701>.

The selection of all excipients and their grades followed a science- and risk-based approach. The following guidance was considered: FDA Guidance for Industry: Orally Disintegrating Tablets; ICH Q8(R2) Pharmaceutical Development.

3.2.P.4 Control of Excipients

Excipients are tested on receipt against the current compendial monograph and the applicant's internal excipient specification. Certificates of analysis from qualified suppliers are reviewed by Quality Assurance prior to release.

3.2.P.5 Control of Drug Product

Release testing includes appearance, identification by HPLC, assay (95.0-105.0%), related substances, dissolution and uniformity of dosage units.
