Stability Protocol SP-509-03

Product: HT-509 Sponsor: Halden Therapeutics, Inc.

This protocol is designed in accordance with ICH Q1A(R2) Stability Testing of New Drug Substances and Products.

1. Storage Conditions

Samples will be stored at 5C plus or minus 3C (long-term) and 25C/60% RH (accelerated).

2. Testing Timepoints

Samples will be pulled at 0, 3, 6, 9, 12, 18, 24 months (long-term); 0, 1, 3, 6 months (accelerated).

3. Acceptance Criteria

Assay 95.0-105.0%; oxidative degradant D-3 NMT 0.2%; pH 4.5-5.5; preservative content 80-110% of label.

4. Deviations

Deviation DEV-2026-022: refrigerator excursion to 11C for 4 hours on 2026-02-14; samples retained and results evaluated as within specification.

5. Bracketing and Matrixing

Bracketing is applied to the 60 mL and 240 mL bottle fills based on identical container closure materials; the 120 mL fill is bracketed.

6. Post-Approval Stability Commitment

The in-use stability study requested under FDA-2025-1120 will be conducted on the first commercial batch.
